

FYI Solutions to Speak at DAMA Day 2016 Symposium

On Thursday, May 19th, FYI's very own Robert Quinn will be speaking about "Innovations in Data Governance Architecture and Analytics". In his session, Robert will describe how innovations in data governance, data architectures, and analytics are helping IT deliver and frontline business teams better utilize data to support critical business outcomes. He'll cover approaches used successfully across a range of clients as well as describe some of the new requirements and innovations we see coming over the horizon.

- Big Data technology and approach
- Machine learning
- Crowd Sourcing Data Quality
- Data Wrangling & Integration

Robert's Session will begin at 4:10 PM.
