

FYI's Cloud Solution for the Midmarket Featuring IBM Cognos Express

Introducing FYI's Cloud Solution featuring IBM Cognos Express, an entirely new way of thinking about Business Analytics. Companies will get all the benefits of integrated planning, forecasting, and business intelligence solutions that help turn data into actionable insight for driving business solutions.

FYI's Cloud Solution is a secure and private cloud-hosted service with unique capabilities that enable midsize companies to easily access their array of Business Analytics services without any infrastructure setup and maintenance costs.

Furthermore, midsize businesses can improve their overall IT capabilities while at the same time reducing IT complexity and costs. This will allow your internal resources to focus on higher value IT services, which can lead to extraordinary cost savings and business innovation.

FYI's Cloud Solution is:

- Simple to use and fast to deploy
- Robust enough to process the most challenging data reporting and analytics needs
- A single virtual server

Features include:

- Development, test and production environments
- Isolated workloads where latency between components is not an issue
- Storage, backup, and restore capabilities
- Elimination of the need for technical staff overhead

With FYI's Cloud Solution, you can:

- ▶ Drive effectiveness and efficiency
- ▶ Rapidly turn information into insight
- ▶ Connect and empower people
- ▶ Significantly reduce provisioning cycle times
- ▶ Increase performance through services that are monitored and optimized
- ▶ Reduce IT configuration operations, support costs and management costs
- ▶ Enable your internal resources to focus on providing higher value IT services to your business.
- ▶ Achieve immediate ROI - since your investment is minimal
- ▶ Trust that all infrastructure services/upgrades / maintenance are covered
- ▶ Achieve continuous, dynamic, automated and up to date protection
- ▶ Improve capital utilization and quality

Quality, Integrity and Trust

FYI Solutions is...

- ▶ Committed to unwavering integrity and to maintaining the highest standards of ethics and quality in every engagement. Our open communication, responsiveness, accountability and reliability have made us a trusted and respected partner to our valued clients
- ▶ Founded and led by business technology professionals with 28 years of industry experience
- ▶ Recognized as an Advanced Level: IBM Business Partner and recipient of Cognos' prestigious North America Industry Solution Award
- ▶ Experienced in delivering successful BI Optimization engagements to satisfied clients across industries

Start thinking differently about infrastructure

FYI's Cloud Solution is a new way of thinking about computing and business. Extraordinary cost savings and business innovation can happen when you are not allocating IT resources for ongoing maintenance, acquiring more storage, adding new servers, or "ripping and replacing" inefficient hardware and software.

FYI Solutions

Additionally, FYI Solutions offers specific services within the Business Analytics practice such as discovery, quick-mart, data warehouse assessment, and vendor/tool evaluation and performance health checks (BI Optimization). Our significant experience in Business Analytics enables FYI Solutions to deliver powerful solutions that give our clients a comprehensive understanding of the factors affecting their business performance and enables better decision-making across the enterprise.
