

## FYI announces partnership with Tableau Software

*Business Analytics Solutions firm to resell leading Data Visualization software product.*

June 1, 2014 Parsippany, NJ - FYI Solutions is excited to announce our partnership with Tableau Software, a leader in data visualization software. FYI is part of the Tableau Reseller Partner Program that markets, sells, implements and supports Tableau solutions. "We are excited to partner with Tableau Software and help customers gain greater insight into their data and improve their decision making through the implementation of Tableau based solutions." said Mindy Rosner-Zaziski, CEO of FYI Solutions "Working together we'll deliver new solutions that help our clients better understand their data, make better decisions and know their business and customers better."

### **About FYI Solutions**

FYI Solutions is a premier provider of Business Analytics solutions and software. Our experience in Business Analytics enables us to deliver powerful systems that give our clients a comprehensive understanding of the factors affecting their business performance and enables better decision-making across the enterprise.

FYI Solutions is an authorized reseller of IBM Cognos, TM1, SPSS, Tableau and Microsoft Business Analytics software. We help clients determine the best software product fit and configuration for their organization. This includes new products, upgrades and annual support renewals at great prices. As an IBM, Tableau and Microsoft Partner, we have had success implementing the full spectrum of business analytics capabilities. These include reporting, analysis, planning, forecasting, scorecarding, dashboards, business event management as well as data integration, on a unified, proven architecture.

### **About Tableau Software**

Tableau Software, based in Seattle WA, helps people see and understand their data by building software for fast analytics and rapid-fire business intelligence. Tableau's award-winning products integrate data exploration and visualization to make analytics fast, easy and fun. The result is pictures instead of rows and columns of textual information. People can rapidly discover key trends and outliers that would otherwise be impossible to see through typical text-based reporting or traditional business intelligence solutions.
