

PROreporting™ for Metastorm BPM®

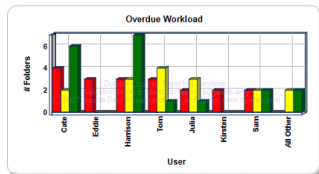

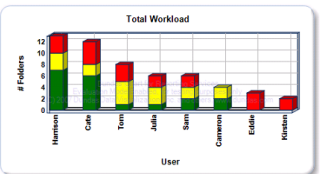

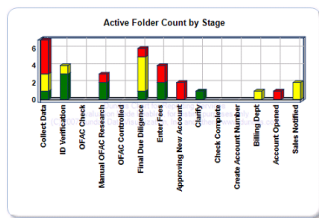

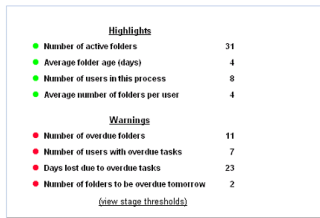

Business Intelligence driven Dashboards and Analytics

Progressive businesses know that business activity monitoring (BAM) and business intelligence (BI) are key components of effective process management. They maximize agility by monitoring key performance indicators (KPIs) and managing business processes in real-time. The power of business intelligence provides a critical link, enabling the enterprise to evaluate all aspects of business process performance and compare business execution to key performance objectives.

Operational Dashboard

PROREPORTING™ for both Cognos and Microsoft BI Analysis and Reporting Services provides organizations using with real-time monitoring, response, and advanced reporting and analysis capabilities. **PROREPORTING™** enables executives, managers, and employees to respond instantly to process events by giving them all of the appropriate information required to make the right tactical and strategic decisions while leveraging their investment in Cognos or Microsoft BI software.

- Maximize the benefits of Metastorm BPM with the power of industry leading BI software
- More flexible, usable and adaptable than older BPM reporting tools
- Gain the benefit of BI software features
- Operational and Performance Dashboards

Business Intelligence and Reporting

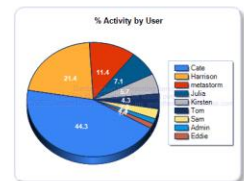

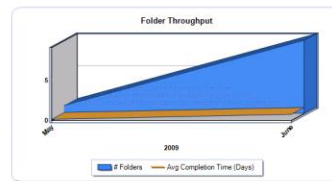

PROREPORTING™ for Metastorm users with Cognos or Microsoft BI reporting and analysis capabilities enables organizations to meet all process analysis and reporting needs. **PROREPORTING™** offers both scheduled and ad-hoc reporting. Users can run and view reports via the Metastorm browser as well as export reports to a PDF or Microsoft Excel file. Administrators control access to reports using Metastorm's Enterprise Role Security function, ensuring that sensitive information is not compromised. Administrators can schedule reports for any Metastorm BPM process on a daily, weekly, monthly, or quarterly basis, and reports can be delivered automatically by e-mail.

For ad-hoc reporting, **PROREPORTING™** features a sophisticated yet easy-to-use report definition tool that enables report designers to create custom reports based on process and line of business data stored in the Metastorm BPM Repository.
